SUMMARY

Proactive Full Stack Developer with expertise in Django, MERN stack, and RESTful API development. Experienced in backend optimization, real-time system features, and multi-role access control. Proven ability to collaborate on impactful software projects and integrate cloud-native DevOps solutions.

Education

Indian Institute of Information Technology Kalyani, BTECH in Computer Science July 2022 – May 2026

- CGPA: 7.6/10.0
- **Relevant Coursework:** Computer Architecture, Data Structures and Algorithms, Operating Systems, Computer Networks, Software Engineering

Experience

MERN Stack Developer, ZIDIO DEVELOPMENT, Remote May 2025 – July 2025

- Engineered scalable React.js user interfaces with MongoDB and Express.js integration.
- Improved frontend responsiveness and maintainability through modular architecture.

Backend Developer, CodeNet Softwares Pvt Ltd, Kalyani Oct 2023 – Dec 2023

- Developed over 10 RESTful APIs in Node.js, reducing backend load time by 30%.
- Collaborated with frontend teams to deliver two projects within six weeks.
- Fixed critical bugs, reducing backend error rate by 25%.
- Participated in Agile sprints, delivering features ahead of schedule.

Projects

Bank Management System Live Demo

- Designed and implemented a multi-role banking platform with dashboards for admin, employees, and customers.
- Integrated a scam detection model within the chat system to enhance security.
- Implemented Razorpay payment gateway for seamless and secure online transaction processing.
- Utilized Django 5.1.7, Bootstrap 5, and PostgreSQL to create a reliable and scalable backend and responsive frontend.

Doctor Appointment System Live Demo

- Developed a comprehensive booking platform for doctors and patients featuring secure JWT-based authentication.
- Integrated calendar scheduling, automated user notifications, and Razorpay payment gateway for seamless payment processing.
- Built a responsive and user-friendly UI with React, managing backend operations using Node.js and MongoDB.

Real-Time Chat Application Live Demo

- Implemented a real-time chat system supporting both group and direct messaging using Socket.io.
- Integrated Google OAuth authentication, rich media sharing, emoji support, and Redux for state management.
- Scaled to support over 500 concurrent users with a robust and responsive MongoDB backend.

Technologies

Languages: Python, JavaScript, C

Frameworks: Django, Node.js, Express.js, React.js, Bootstrap

Databases: MongoDB, PostgreSQL, SQLite

APIs/Libraries: RESTful APIs, JWT, WebSockets, Redux

Tools: Docker, Vercel, Render, Google Cloud, Git, CI/CD

Methodologies: Agile, SCRUM
